

CASE ID: 200203710705

EPISODE NAME: China-Kazakhstan Steel Imports

2002/03/26 - 2008/09/23

Sender: China (710)

Target: Kazakhstan (705)

Issue: Trade Practices (13)

Final Outcome: Stalemate after Sanctions Imposition (9)

Narrative:

On 2004/01/14, China imposed anti-dumping tariffs of up to 55 percent on cold rolled steel products from Taiwan, South Korea, Russia, Ukraine and Kazakhstan.¹

The initial onset of the episode began on 2002/03/26, when China's Ministry of Foreign Trade and Economic Cooperation announced the beginning of an anti-dumping investigation into the five countries' cold-rolled steel, following allegations from Chinese steel conglomerates.²

The investigation found all countries involved guilty of dumping cold-rolled steel into the Chinese market, with China's Ministry of Commerce explaining that, "the ministry has decided that dumping of such products does exist, and has caused substantial damage."³

Chinese steel company Wuhan Steel welcomed the decision, saying that, "the decision will have a positive impact on the company's operations and production."⁴ Other Chinese steel companies, such as Shanghai Baosteel Group Corporation and Anshan Iron & Steel Group, alongside the aforementioned Wuhan Steel, had lobbied China to open a probe into steel imports.⁵

The sanctions expired on 2008/09/23.⁶ None of the countries are reported to have retaliated.
