

CASE ID: 202409710020b

EPISODE NAME: China Imposes Canola Tariffs on Canada

2024/09/09 - Present

Sender: China (710)

Target: Canada (20)

Issue: Retaliation (16)

Final Outcome: Ongoing

Narrative:

On 2024/09/09, China announced a one-year anti-dumping investigation into Canadian canola oil.¹ While China claimed there was preliminary evidence of dumping, most sources attributed the decision to Canada's announcement of 100% tariffs on Chinese EVs shortly before the investigation opened.² Roughly half of Canadian Canola oil was exported to China in the years before the investigation, totaling \$3.74 billion in revenue.³ Almost all of China's supply of Canola oil – 94 % – was imported from Canada.⁴

The Chinese Ministry of Commerce imposed 78.5% provisional tariffs on 2025/08/13.⁵ The decision essentially closed the Chinese market to Canadian canola, causing major disruptions for Canadian rapeseed producers.⁶ China itself had few alternative suppliers of canola oil.⁷

On 2026/02/28, China lowered its final tariff rate to 5.9% following prime minister Mark Carney's visit to Beijing.⁸ The sanctions are still in place.
